

Mobilis 2014

2nd Dec.Strasbourg - France www.mobilisconference.com

THE FUTURE OF MOBILITY

2ND DECEMBER @RÉGION ALSACE

New Ecosystems

Electric drive systems and automated driving are the two major changes which will challenge the automotive and transportation industries in the coming years.

The proliferation of electrified and self-driving vehicles at a large scale defines the shape of a fast-moving world in which newcomers are emerging beside traditional players. Transportation has become, more than ever, a complex sector where ICT, energy and vehicle manufacturing get interlinked. New ecosystems are being built.

To foster our competitiveness and sustain jobs our approach to think the future of mobility is bound to evolve. You are invited in Strasbourg on Tuesday 2nd December 2014 to share your views on this topic.

10.00-12.00 & 13.00-17.00

Business Networking

organised by:

Find business partners, meet clients & suppliers, initiate technology transfers, incorporate a European R&D project..., the business meetings will give you the opportunity to optimise your contacts in the shortest time. Structured in confidential discussions, the appointments aim to improve business cooperation between the actors of transport and mobility. These sessions of mutual exchange will complete the networking of the conferences.

Organised by Enterprise Europe Network, they are appreciated by the European companies as a facilitating tool for business.

REGISTRATION FEES

• Members of Pôle Véhicule du Futur:

€150 + 10% VAT per person

• Other visitors:

€200 HT + 10% VAT per person
